PARKS REGULATED BY THE MAINE MANUFACTURED HOUSING BOARD WATER QUALITY TESTING REQUIRED FOR NEW WELL APPROVAL

Inorganic Parameters: A good indicator of general ground water quality. Includes: nitrate, nitrite, chloride, total hardness, calcium, magnesium, fluoride, sulfate, antimony, uranium, beryllium, nickel, copper, iron, manganese, zinc, arsenic, barium, cadmium, chromium, lead, mercury, silver, selenium, sodium, thallium, color, turbidity, pH, total coliform. ("Test E6" at State Lab)

Volatile Organic Compounds: A screening procedure which can detect the presence of more than 50 different hydrocarbon compounds including gasoline, kerosene, #2 fuel oil and many industrial solvents. ("Test VOC 524" at State Lab)

Radon in Water: A test which indicates the activity of radon gas, a naturally occurring radioactive gas which occurs at elevated levels in some Maine ground water. (Test "Radon Water" at State Lab)

Gross Alpha: A test for radioactivity exclusive of that from radon. Usually indicates the presence of uranium or radium. (*Test "Gross Alpha" at State Lab*)

For a list of labs certified by the State of Maine, contact the Drinking Water Program at (207) 287-2070. To order bottles from the State Health & Environmental Testing Lab, call 287-1716.

Water test results should be photocopied and mailed to: Drinking Water Program
Department of Health & Human Services
State House Station #11
Augusta, Maine 04333-0011
Call (207) 287-2070 if you have any questions
